Dear Liron,

We appreciate your interest in PPG products and are responding to your request to Karin Weikart dated July 1, 2014 for information on the PPG Product, B3755.

The EU Directive 2011/65/EU “Restriction on the Use of Certain Hazardous Substances” (RoHS 2) requires all Member States (per Article 4(1) of the Directive) to ensure that materials and components of electrical and electronic equipment put on the market after 1 July 2006 do not contain the following specific hazardous substances: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs).

We have reviewed this product with regard to the EU Directive 2011/65/EU and based on our current knowledge of this product and the information (such as safety data sheets [SDSs]) provided to PPG by its raw material suppliers, the PPG Product B3755 does not contain cadmium, hexavalent chromium, lead, mercury, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs) at levels greater than the tolerated maximum concentration values.

Do not hesitate to contact me if you have additional questions regarding PPG products.

Sincerely,

A handwritten signature in black ink that reads 'Karen Beckmann'. The signature is written in a cursive, flowing style.

Karen Beckmann
Manager, Industrial Coatings Product Stewardship
